

# Komatsu H056-HE Advanced Performance Hydraulic Fluid

Energy efficient.  
Synthetic. Long-lasting.

## Formulated for your Most Demanding Hydraulic Applications

- Zinc-based, anti-wear hydraulic oil made from synthetic fluid
- Delivers outstanding cold-start performance and excellent resistance to oxidation at high temperatures
- Helps solve the issue of oil degradation of machines operating in hot environments
- Specialty formulation maintains viscosity range throughout the full life of the fluid
- Performs with greater energy efficiency to reduce fuel consumption and extend oil drain intervals

# Komatsu HO56-HE Advanced Performance Hydraulic Fluid

**Komatsu HO56-HE is an advanced anti-wear hydraulic oil designed for superior performance. Different from traditional anti-wear hydraulic fluids made from mineral oil, Komatsu HO56-HE is made from synthetic fluid that delivers outstanding cold-start performance and excellent resistance to oxidation at high temperatures.**

Komatsu HO56-HE is specially formulated to help solve the issue of oil degradation of machines operating in hot environments. This makes Komatsu HO56-HE the ideal choice for a variety of applications where ISO VG 68 and ISO VG 46 hydraulic oils are used and specifically in high-temperature equipment operating in rugged environments or hot industrial facilities.

## Improved Productivity

Komatsu HO56-HE has the potential to last longer than conventional anti-wear oils, reducing the amount of downtime needed for routine oil drains. Additionally, Komatsu HO56-HE is compatible with anti-wear hydraulic oils, which may enable sites to consolidate multiple hydraulic oils across their fleet of mobile and stationary equipment down to one—effectively simplifying their on-going maintenance program.

## Improved Safety

Komatsu HO56-HE helps prevent valves from sticking—resulting in less time doing “reactive maintenance” on components of hydraulic systems that often fail. Less replacement work means a reduced level of risk doing unnecessary and preventable component change-outs.

## Lower Operating Cost

As a more energy efficient hydraulic fluid, Komatsu HO56-HE can reduce overall fuel costs compared to using conventional anti-wear hydraulic fluids.
